Education

Fast Nuces Lahore

June 2025

Bachelor of Science in Computer Science

Lahore, Punjab

- **Relevant Coursework:** Data Structures and Algorithms (C++), Prob & Stat, Linear Algebra, Software For Mobile Devices, Software Engineering, Artificial Intelligence

Experience

OneDown Solutions

October 2024 – June 2025

Junior Python / AI Engineer

Remote, Pakistan

- Built and optimized humanized AI-bot systems capable of contextual multi-turn conversations.
- Developed AI-powered web applications using LangChain, Groq, and Gemini models for text generation, reasoning, and retrieval tasks.

KCube AI

June 2025 – October 2025

Associate Full Stack Developer

Lahore, Pakistan

- Developed full-stack React + FastAPI applications with focus on performance, authentication, and REST APIs.
- Implemented reusable UI components, API integrations, and optimized server-side logic for scalable workflows.

XBot Labs

October 2025 – Present

Software Engineer

Lahore, Pakistan

- Engineered end-to-end AI-powered solutions, including RAG pipelines, agentic workflows, and production-grade backends.
- Worked extensively with AWS (EC2, RDS, S3, IAM) to deploy, monitor, and scale AI web applications.

Projects

JooljuAI | FastAPI, OpenAI SDK, React, React Query, RDS, EC2, RAG, SQLModel

- Engineered a signal-generation system that aggregated historical data from Reddit, Google Trends, and other sources to uncover hidden user needs and emerging market opportunities.
- Designed and executed 10+ automated jobs to process and analyze large volumes of multi-source data; deployed backend on EC2 with persistent storage in RDS.
- Optimized architecture to handle hundreds of concurrent requests using multi-threading, AsyncIO, DB indexing, and batch processing.

AI Clinic | Django, Google GenAI Studio, APScheduler, Twilio, HTML5, CSS3

- Developed an AI-powered web platform that helps elderly users engage in mindfulness and wellness activities.
- Implemented periodic personalized exercise generation based on users' historical feedback using scheduled jobs.
- Integrated a conversational bot to assist users with guidance and support.

Prostate Cancer Detection | Python, OpenCV, Keras, PyTorch, FastAPI, ReactJS

- Built multiple CNN-based models to detect prostate cancer from pathological images.
- Achieved AUC and accuracy above 0.90 through extensive preprocessing, augmentation, and hyperparameter tuning.
- Developed a full-stack deployment: FastAPI backend with ReactJS frontend for inference.

AI Code Helper | LangChain, LlamaIndex, RAG, Agentic AI

- Developed an AI agent capable of reading documentation, writing code, and answering complex technical queries using RAG workflows.
- Published an in-depth tutorial on building agentic systems using LlamaIndex on Medium: [Article Link](#)

Technical Skills

Languages: Python, C, C++, Java, Solidity, JavaScript

Technologies: React.js, Django, TensorFlow, Bootstrap, Android SDK, NextJS, Scikit-Learn, Pandas, Seaborn, Tailwind CSS, Azure Synapse Analytics, Azure DataFactory, OpenAI API, Diffuser, HuggingFace

Concepts: Compiler, Operating System, Virtual Memory, Cache Memory, Encryption, Decryption, Artificial Intelligence, Machine Learning, Neural Networks, API, Database Normalization, Agile Methodology, Cloud Computing
